Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/625,764

Applicant(s)

LIPPMAN ET AL.

Examiner

GREGORY G. TODD

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 December 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Response to Amendment

1. This office action is in response to applicant's amendment filed, 03 December 2007, of application filed, with the above serial number, on 22 July 2003 in which claims 1, 3, and 15 have been amended. Claims 1-20 are therefore pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Reisman (hereinafter "Reisman", 6,658,464).

As per Claim 1, Reisman teaches a computer-implemented local resource access system, comprising:

an initiating program having an instruction that generates a request for access to a local resource, the request including a token and having the form of a hyperlink and wherein the local resource is not accessible directly from the initiating program (at least col. 36, lines 22-67; also col. 52 line 35 - col. 53 line 54; browser hyperlink for local content); and

a translator program that receives the access request from the initiating program, the translator program further comprising instructions that generate a return token in response to the access request and instruction that return the return token to the initiating program, the return token further comprising a hyperlink containing a path to the local resource (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; link interceptor/ translator).

As per Claim 2. The system of claim 1, wherein the initiating program further comprises an instruction that receives the return token and an instruction that launches an application to execute the local resource pointed to by the return token (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 25-47; eg. completion of calling link).

As per Claim 3. The system of claim 1, wherein the translator program further comprises a local application that is part of a media delivery system (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 12-60).

As per Claim 4. The system of claim 3, wherein the translator program further comprises a local server that is part of a media delivery system (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 12-60; server).

As per Claim 5. The system of claim 1, wherein the translator program further comprises a web page plug-in and wherein the initiating program further comprises a web page (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; col. 44, lines 1-19; plugin, web pages).

As per Claim 6. The system of claim 1, wherein the initiating program further comprises an e-mail client application (at least col. 52, lines 33-67; email).

As per Claim 7. The system of claim 1, wherein the initiating program further comprises a messaging client application (at least col. 52, lines 33-67; email).

As per Claim 8. The system of claim 1, wherein the translator program further comprises an instruction that applies a network security policy to the return token wherein a validated return token is returned to the initiating program if the network security policy is satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 9. The system of claim 8, wherein the network security policy returns an error report if the network security policy is not satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 10. The system of claim 5, wherein the translator program further comprises an instruction that applies a network security policy to the return token wherein a validated return token is returned to the initiating program if the network security policy is satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 11. The system of claim 10, wherein the network security policy returns an error report if the network security policy is not satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 12. The system of claim 10, wherein the initiating program further comprises a java script that generates a hyperlink to the local resource if the validated return token is returned (at least col. 39, lines 30-48; col. 37, lines 1-48; java).

As per Claim 13. The system of claim 1, wherein the return token generation instruction further comprises an instruction for determining the type of hyperlink to be sent to the initiating program (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; eg. filename).

As per Claim 14. The system of claim 13, wherein the type of hyperlink comprises one of a localhost link, a loopback link, a file link and a protocol link (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; col. 45 line 65 – col. 46 line 24).

Claims 15-20 do not substantially add or define any additional limitations over claims 1-14 and therefore are rejected for similar reasons.

Response to Arguments

4. Applicant's arguments filed 03 December 2007 have been fully considered but they are not persuasive. Applicant argues Reisman does not teach an initiating program having an instruction that generates a request for access to a local resource, the request including a token and having the form of a hyperlink and wherein the local resource is not accessible directly from the initiating program. However, Reisman, as discussed below with relation to the translator program, teaches that the initiating program (offline browser) cannot directly access the URL and must use translation to

access the respective link (at least col. 43, lines 12-60). Further, as the disclosure suggests, an initiating program may also be email related, which Reisman also touches upon, retrieving email and then local resources can be linked to and used when the user is offline reading the email (see col. 52 line 35 - col. 53 line 65).

Applicant further argues Reisman does not teach a translator program that receives the access request from the initiating program, the translator program further comprising instructions that generate a return token in response to the access request and instruction that return the return token to the initiating program, the return token further comprising a hyperlink containing a path to the local resource. However, Reisman clearly teaches a link interceptor and translator, which intercepts the initiating program's (in this case offline browser) link request, translates it, and passes the translation back to the offline browser for completion (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; link interceptor/ translator).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

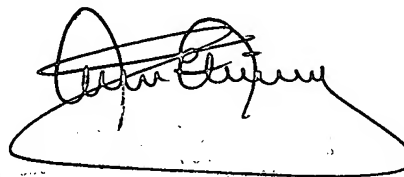

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newly cited Pallmann , in addition to previously cited Simpson et al, Bellotti et al, and Beged-Dov et al are cited for disclosing pertinent information related to the claimed invention. Applicants are requested to consider the prior art reference for relevant teachings when responding to this office action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREGORY G. TODD whose telephone number is (571)272-4011. The examiner can normally be reached on Monday - Friday 9:00am-6:00pm w/ first Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571)272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
